

REMARKS

By the present amendment supplementing the amendments and remark of the response filed on October 24, 2005, Claims 7, 13, 15, 18, 23 and 26 have been canceled and a replacement title has been submitted. No new subject matter has been introduced by way of the present amendments.

I. Objection to Specification

The specification has been objected to as allegedly having a title that is not descriptive. In response, a replacement title is submitted by way of the present response. Specifically, the replacement title recites: "HERMETICALLY SEALED IMAGING SYSTEM FOR MEDICAL APPLICATIONS." Accordingly, Applicants respectfully request withdrawal of the objection to the specification.

CONCLUSIONS

In view of the foregoing amendments and remarks, it is respectfully submitted that all claims presently pending in the application, namely, Claims 1-6, 8-12, 14, 16-17, 19-22, 24-25 and 27-28 are believed to be in condition for allowance and patentably distinguishable over the art of record.

If the Examiner should have any questions concerning this communication or feels that an interview would be helpful, the Examiner is requested to call Applicants' undersigned attorney at the number indicated below.

Respectfully submitted,
